TECHNICAL SKILLS

- **Programming Languages:** JavaScript, TypeScript, HTML, CSS, SCSS
- **Libraries/Frameworks:** React, Angular, Node.js, Express.js, Tailwind CSS, Material UI, Redux, Mongoose
- **Databases:** MongoDB
- **Testing Tools:** Jest, Cypress
- **Tools:** Git, GitLab, Jira, VS Code, Postman, Nginx, AWS
- **Skills:** Responsive Design, State Management, authentication, Frontend Testing, JWT, OAuth, optimizing databases, Cross-Browser Compatibility

EXPERIENCE

Mountblue Technologies

Frontend Developer

08/2022 – 12/2023

Bengaluru, Karnataka

- Worked on MOSIP (Modular Open Source Identity Platform) as part of a client project, focusing on developing and maintaining responsive web applications using React.js and Angular.
- Worked with backend developers to connect web applications with RESTful APIs, improving functionality and user experience.
- Collaborated with the product team to understand user needs and build front-end features that meet business goals.

MOSIP - IITB

Full Stack Developer

01/2024 – Present

Bengaluru, Karnataka

- Transitioned to working directly with MOSIP as a consultant, continuing to contribute to its web application development.
- Designed and implemented a user-friendly pagination system for handling large datasets retrieved from REST APIs.
- Developed a virtual keyboard feature, enabling users to input text in multiple languages, thereby improving accessibility for diverse user groups.
- Developed custom IAM solutions with Keycloak and Keycloakify, including tailored themes and UIs.

EDUCATION

Bachelor of Commerce – Computer Applications

Aditya Degree College - Kakinada

2020

CERTIFICATIONS & Awards

NxtWave Disruptive Technologies – CCBP Intensive Bootcamp Trainee

Node.js & Frontend System Design Course – Namaste Dev

Key Contributor Award – Awarded for outstanding performance on a project

PROJECTS

Resident Portal - Tech Stack: Angular | TypeScript | Material UI | REST APIs | TypeScript

Resident Portal is a web-based interface that allows residents (citizens or individuals using the identity system) to access, manage, and update their identity-related information in a secure and user-friendly manner.

Compass Admin - Tech Stack: ReactJS | JavaScript | Tailwind | Daisy UI | Keycloak

Developed the frontend for comPASS, a secure web portal for issuing and managing digital credentials.

Integrated **Keycloak** for authentication and role-based access control. Designed a responsive UI for manual data entry, ensuring a smooth user experience

DevTinder - Tech Stack: Node.js | Express | MongoDB | Mongoose | ReactJS | Tailwind CSS | Daisy UI

Developed DevTinder, a networking app for developers to connect and collaborate.

Implemented interactive features, built a secure RESTful backend, and **deployed the app on AWS** for scalable performance.
